

Agricultural Buildings

RNH Construction specialise in the fabrication of all types of steel framed buildings including clear span portal framed buildings. From design and manufacturing the steelwork through to the final construction, RNH Construction are able to handle the whole of your steel framed building needs.

Our steel framework manufacturing facility is based at Market Drayton near Telford in Shropshire. Our huge factory provides considerable capacity for the widest range of design and size of steel framed buildings.

- We work closely with Architects and Designers all over the UK
- Our agricultural buildings conform to BS5502, our industrial buildings conform to BS5950
- We have an in-house design team using the latest CAD software
- We are a family owned business from a farming background

RNH Construction - experts in steel framed agricultural buildings. Our background and extensive knowledge of farming enables us to understand the practical use that the agricultural building is to be designed for.

We are able to work with you through the design process, planning application process, undertake groundworks, manufacture the steel structure for you and advise on cladding options. We are also able to fabricate and install all of the internal fittings.

- Hay Barns
- Grain Stores
- Cattle Buildings
- Sheep Buildings
- Pig Buildings
- Poultry Units
- Cubicle Buildings
- Implement Buildings
